OFFICIAL

Listing of the Claims:

Claim 1 (previously presented) A delayed release oral pharmaceutical dosage form

comprising a core material coated with a semipermeable membrane, wherein:

the core material comprises an active ingredient selected from the group

consisting of omeprazole, an alkaline salt thereof, *S*-omeprazole and an alkaline salt

thereof, one or more alkaline additives, one or more swelling agents, and optionally

pharmaceutically acceptable excipients;

the membrane consists essentially of a water-insoluble polymer and a modifying agent and is able to disrupt;

and the dosage form is not enteric coated.

Claim 2 (cancelled)

Claim 3 (previously amended) The dosage form according to claim 1, wherein the active ingredient is omeprazole.

Claim 4 (previously amended) The dosage form according to claim 1, wherein the active ingredient is a magnesium salt of omeprazole having a crystallinity of more than 70% as determined by X-ray powder diffraction.

Claim 5 (previously amended) The dosage form according to claim 1, wherein the active ingredient is a magnesium salt of *S*-omeprazole.

Claim 6 (previously amended) The dosage form according to claim 1, wherein the core material comprises a sugar sphere layered with a suspension or solution of the active ingredient, one or more alkaline additives, one or more swelling agents and optionally pharmaceutically acceptable excipients.

Claim 7 (previously amended) The dosage form according to claim 1, wherein the dosage form comprises individual pellets of the core material coated with the semipermeable membrane.

Claim 8 (previously amended) The dosage form according to claim 1, wherein the core material further comprises an osmotic agent.

Claim 9 (previously amended) The dosage form according to claim 1, wherein the alkaline additive gives a pH of not less than 8.5 when measured in a 2% w/w water solution/dispersion with a pH-measuring electrode.

Claim 10 (previously amended) The dosage form according to claim 9, wherein the alkaline additive is selected from the group consisting of disodium hydrogen phosphate, trisodium phosphate, arginine and talc.

Claim 11 (previously amended) The dosage form according to claim 1, wherein the alkaline additive is present in an amount of approximately 5 to 35% by weight of the core material excluding the weight of an optional sugar sphere.

Claim 12 (previously amended) The dosage form according to claim 1, wherein the alkaline additive is present in an amount of 15 to 35% by weight of the core material excluding the weight of an optional sugar sphere.

Claim 13 (previously amended) The dosage form according to claim 1, wherein the swelling agent is selected from the group consisting of crosslinked polyvinyl pyrrolidone, crosslinked sodium carboxymethylcellulose, sodium starch glycolate and low-substituted hydroxypropyl cellulose (L-HPC).

Claim 14 (previously amended) The dosage form according to claim 1, wherein the swelling agent is present in an amount of approximately 20 to 60% by weight of the core material excluding the weight of an optional sugar sphere.

Claim 15 (previously amended) The dosage form according to claim 1, wherein the swelling agent is present in an amount of 30 to 50% by weight of the core material excluding the weight of an optional sugar sphere.

Claim 16 (previously amended) The dosage form according to claim 1, wherein the modifying agent is talc or fumed silica.

Claim 17 (previously amended) The dosage form according to claim 1, wherein the water insoluble polymer is selected from the group consisting of ethylcellulose, cellulose acetate, polyvinyl acetate, and ammonio methacrylate copolymer type A and type B.

Claim 18 (previously amended) The dosage form according to claim 1, wherein the water insoluble polymer is present in an amount of approximately 3-30% by weight of the core material.

Claim 19 (previously amended) The dosage form according to claim 1, wherein the modifying agent and water insoluble polymer are in a ratio of between 90:10 and 50:50.

Claim 20 (currently amended) A process for the manufacture of a delayed release dosage form as defined in claim 1, comprising forming a core material comprising an active ingredient selected from the group consisting of omeprazole, an alkaline salt thereof, S-omeprazole and an alkaline salt thereof, one or more alkaline additives, one or more swelling agents, and optionally pharmaceutically acceptable excipients, and coating the core material with a semipermeable membrane, wherein the dosage form has no enteric coating.

Claim 21 (canceled)

Claim 22 (canceled)

Claim 23 (currently amended) A method for improving inhibition of gastric acid secretion which comprises administering to a patient in need thereof, a delayed release ~~an~~ oral pharmaceutical dosage form according to any one of claims 1 or 3-19.

Claim 24 (currently amended) A method for improving the therapeutic effect in the treatment of gastrointestinal disorders associated with excess acid secretion which comprises administering to a patient in need thereof, a delayed release ~~an~~ oral pharmaceutical dosage form according to any one of claims 1 or 3-19.

Claim 25 (currently amended) A delayed release ~~An~~ oral dosage form according to any one of claims 1 or 3-19 filled in a capsule.

Claim 26 (currently amended) A delayed release ~~An~~ oral dosage form according to any one of claims 1 or 3-19 compressed into a multiple unit tableted dosage form, optionally comprising tablet excipients.
